

FIRAS BOURAOUI

Tunis, Tunisia fbouraoui77@gmail.com +21650825028 linkedin.com/in/firas-bouraoui77 github.com/FirasBrr

SUMMARY

Software Engineering student with full-stack development experience across React, Next.js, Spring Boot, and Node.js, plus exposure to industrial protocol integration through a recent internship. Seeking a Summer 2027 internship to apply and grow these skills in a real-world engineering environment.

EXPERIENCE

Intern

Elco Solutions

June 2026 - August 2026, Tunis, Tunisia

- Developed a diagnostic module for Modbus (TCP/RTU) and MQTT communication protocols, enabling users to test device configurations before deployment, reducing troubleshooting time on the industrial gateway.
- Built a Full Test Dashboard allowing one-click testing of all configured Modbus devices and MQTT connections with real-time visual feedback, isolating failures per device without blocking the rest of the diagnostic run.
- Implemented error classification with user-friendly messages and actionable suggestions, translating low-level protocol errors into readable diagnostics for non-developer users.

Intern

CNI – National Center of Informatics

February 2024 - May 2024, Tunis, Tunisia

- Developed an API request management platform for Tunisia's National Interoperability Project using Angular, Spring Boot, and PostgreSQL, enabling the management of 100+ API service requests across multiple government entities.
- Implemented JWT authentication, role-based access control for 3+ user roles, and multi-step validation workflows, improving request security and reducing manual validation time by 40%.
- Built real-time API dashboards and automated request tracking features, reducing request monitoring effort by 50% and improving workflow visibility for project stakeholders.

PROJECT

AI Interview Simulator | MongoDB, Express, React, Node.js, Vapi, Gemini API

github.com/FirasBrr/interview-simulator

- Developed an AI-powered interview simulation platform with real-time voice interaction.
- Implemented custom interview configurations (job role, difficulty, interviewer style).
- Built dynamic interview flows with follow-up questions based on user responses.
- Stored interview history and transcripts for progress tracking.

AI Learning Platform | Next.js, MongoDB, TailwindCSS, Gemini API

github.com/FirasBrr/lms-platform.git

- Built a full-stack learning platform with role-based access (Student, Instructor, Admin).
- Developed course management features (enrollment, progress tracking) and integrated an AI chatbot.
- Developed AI-driven course recommendation features based on user learning activity.

Healthcare Appointment System | Symfony, MySQL

github.com/FirasBrr/HealthCareSystem

- Developed a role-based healthcare platform for Admins, Doctors, and Patients.
- Implemented appointment booking with availability validation.
- Built doctor scheduling system with calendar-based availability.
- Implemented prescription upload and download functionality.

EDUCATION

Engineering Degree in Software Engineering

Tekup University •

Tunis, Tunisia • 2025 - Present

Bachelor's Degree in Computer Science

Higher Institute of Computer Science and Multimedia of Gabes (ISIMG) •

Gabes, Tunisia • 2021 - 2024

SKILLS

Programming Languages: Java, Python, JavaScript, C#

Frontend: React, Next.js, Angular, HTML, CSS, Bootstrap, TailwindCSS

Backend: Node.js, Express.js, Spring Boot, Symfony, ASP.NET

Databases: MySQL, MongoDB, PostgreSQL

Industrial Protocols: Modbus (TCP/RTU), MQTT

Tools & Technologies: Git, Postman, GitHub, JWT Authentication, Render, REST APIs, VS Code

CERTIFICATIONS

Microsoft Azure AI Fundamentals

Microsoft Dynamics 365 Fundamentals (CRM)
